LEOQ PRODUCER #

FADQ #

Farming operations that declare sales of breeding stock within the ASRA program must meet the requirements so that animals sold are eligible for the program. Since the 2010 insurance year, the breeder must:

1 - have a livestock operation where at least 10% of breeding females are registered as purebred animals with the Canadian Livestock Records Corporation or recognized by La Financière agricole & destined for the production of purebred, hybrid or cross-bred lambs within the farming operation (ASRA program, Art. 28.2)

2 - participate in the GenOvis testing program for domestic sheep at the Centre d'expertise en production ovine du Québec (CEPOQ) & carry out an evaluation of animals sold (ASRA program, Art. 28.2, 48.0.1), for:

- 1) purebred, hybrid or cross-bred ewe lambs of between 109 & 365 days of age;
- 2) young registered rams, or recognized by La Financière agricole, of between 109 & 548 days of age at sale.

1- REQUIREMENT FOR 10% REGISTERED PUREBRED ANIMALS OR RECOGNIZED BY FADQ

Total number of ewes in inventory

Number of females eligible on an annual basis such that they are included in the payment slip for the ASRA program, between January 1st and December 31st 2025.

Number of registered purebred ewes

Average between January 1st and December 31st 2025.

To be eligible, recognized ewes must belong to a producer who is enrolled in the ASRA program & the purebred ewes must be registered with the Canadian Livestock Records Corporation (CLRC) as animals in the name of the producer who is enrolled in the recognized ASRA program.

The registration documents must be completed and in the possession of the producer who is participating in the program. It is the responsibility of the producer to keep the proof of sale and invoices for breeding stock as well as all the registration records for these animals. These data will be processed as part of the Programme d'assurance stabilisation des revenus agricoles du Québec (Quebec Farm Income Insurance Stabilization Program).

☐ I acknowledge owning breeding stock with at least 10% of the breeding females as purebred animals registered with CLRC and intended for the production of purebred, hybrid or cross-bred lambs within the farming operation.

2- EVALUATION OF ANIMALS SOLD UNDER THE GENOVIS PROGRAM

To be eligible, lambs sold as breeding stock must undergo a complete evaluation by the GenOvis program administered by the Centre d'expertise en production ovine du Québec.

Participants must be enrolled in the GenOvis program for the campaign that covers the time when the animals are sold, pay the registration fees and transmit the following information to CEPOQ for each animal sold:

- ↳ Lamb ID
- ↳ Birth date
- ↳ ID of the mother and her breed
- ↳ ID of the father and his breed
- ↳ # born & # raised
- ↳ Weight of the lamb at 50 days (between 28 & 69 days)
- ↳ Weight of the lamb at 100 days (between 70 & 120 days)

☐ I acknowledge that I will evaluate all animals used for breeding and that I participate the GenOvis program.

ATTESTATION

I, _____ declare that the information above
Duly authorized representative of the farming operation (capital letters)

is in conformity with the requirements and confirm that, for the designated year of coverage, I have respected these requirements related to eligibility for the ASRA program with regard to sales of breeding stock as previously described.

Producer's Signature: _____ Date: _____
